Indian Journal of Veterinary Public Health Guidelines for Authors

About the Journal:

Indian Journal of Veterinary Public Health is a peer-reviewed journal published biannually by Association of Public Health Veterinarians. The journal allows the contributors free access to its contents and permits authors to self-archive final accepted version of the articles.

Scope of the journal

Indian Journal of Veterinary Public Health accepts original research articles, short communications and reviews in Veterinary, Animal, Dairy and Fishery Sciences with special emphasis on Public Health, Microbiology, Parasitology, Pathology, Food Safety, Food Hygiene, Health Policy etc. An **original research article** covers results of the primary research with precise description of methodology so that it can be reproduced in other laboratories and clear interpretation of the work, which has not been published elsewhere. A **short communication** is intended to communicate novel ideas and results in new and developing areas of veterinary, animal and fishery sciences, but is limited in the level of performed investigations and is thus insufficient to fulfil the requirements of a full paper. A **review** aims to provide an overview or a meta-analysis for an issue of great public health interest written by experts in the domain.

Editorial Process

The number of articles selected for each issue of the journal may vary and will be decided by the Editorial Board. A manuscript will be reviewed for possible publication with the understanding that it is being submitted solely to Indian Journal of Veterinary Public Health and has not been published, submitted, or already accepted for publication elsewhere. The journal expects that authors would authorize one of them as 'corresponding author' to communicate with the Journal for the issues related to the manuscript. The contributors are encouraged to provide names of at least two qualified reviewers who have experience in the subject of the submitted manuscript and do not have conflicts of interest. The selection of the reviewers shall be at the sole discretion of the editor/ handling editor. The journal follows a double-blind review process, wherein the reviewers and authors are unaware of each other's identity. Based on the comments from the reviewers the editorial team takes a final decision on the manuscript. The comments and suggestions (acceptance/rejection/ revisions in manuscript) received from reviewers are conveyed to the corresponding author. Authors are required to provide a point-by-point response/rebuttal to reviewers' comments and submit a revised version of the manuscript. After satisfaction of the reviewers and editor with the revision/rebuttal of the manuscript finally it is accepted for publication.

Preparation of Manuscripts

Manuscripts should be written in concise, legible English, which must be carefully reviewed by the authors for correct grammar and syntax. English spelling can be either British or American, but it must be consistent throughout the manuscript. Manuscripts should be prepared in Times New Roman 12-point font, with double line spacing and justified aligned text throughout. The four margins will be 2.5 cm. Section headings (level 1) need to be written in 14-point bold font. Sub-headings (level 2) need to be written in 12-point bold italic font. Authors name would be in central alignment. A corresponding author must be mentioned from within the authors list of the article. **All pages should be numbered consecutively starting after the title page**, and continuous line numbers should be used to facilitate easy reference by the reviewers. **All figures should also be sent separately (other than manuscript word file) in JPEG or TIFF format at 600 dpi.**

Original Research article should be written within 8 to 15 manuscript pages (or 2,500 to 4,500 words), including tables and figures. Research articles should include a title page, an abstract with maximum 250 words, up to five keywords. The main text should include the following sections: introduction, materials and methods, results and discussion, conclusion, conflict of interest, data availability, ethical statement, author's contribution, acknowledgments, references, tables and figures.

Short communication should be within 5 to 8 manuscript pages (or 1,500 to 2,500 words), including tables and figures. Short communications should include a title page, an abstract with maximum 150 words, up to five keywords, main text not divided into subsections, conflict of interest, data availability, ethical statement, author's contribution, acknowledgments, references, and a maximum of three tables and/or figures.

Plagiarism Policy: The Indian Journal of Veterinary Public Health (IJVPH) is committed to upholding the highest academic integrity and originality standards. To ensure the authenticity of published research, IJVPH has established its own plagiarism policy, which is rigorously enforced through screening and detection procedures. Authors must comply with this policy, and plagiarism will be addressed promptly and appropriately. IJVPH uses advanced plagiarism detection software to screen all submitted manuscripts and detect any instances of plagiarism. Authors found to have violated our plagiarism policy will be subject to penalties, including manuscript rejection, withdrawal, or retraction, and may be banned from submitting to IJVPH in the future.

Conflict of interest: Author must disclose whether there is any conflict of interest or not. They have to disclose any personal relationships with other peoples of organizations that may influence their work. Potential conflicts of interest are employment, consultancies, honoraria, paid expert support, patent application/registration and grants or other funding.

Data availability: All original research must include a data availability statement. Data set generated during research need to be available from the corresponding author on reasonable request.

Authors' contribution: Contribution of each author in the manuscript needs to be specified.

Ethical approval: If a study involves direct research on humans/ animals / poultry/ zebra fish, the study needs to be approved by competent authority and the approval statement needs to be provided.

Acknowledgments: When it is considered necessary, acknowledgements should be made to the people, centers or bodies that have collaborated or supported to carry out the work in any form including fund support. Contributors who did not meet any one of the criteria for authorship should not be listed as authors, but they should be acknowledged. The source of funding for the study, if any, should be disclosed.

References:

When references are cited in the text, the author's surname should be provided in parentheses, followed by a comma and the year of publication; for example, "(Chowdhury, 2023)...". If there are two authors, the surnames should be followed by "and"; for example, "...(Dutta and Pandit, 2023)...". If there are three or more authors, include the surname of the first author followed by "et al." and a comma; for example, "...(Chowdhury et al., 2023)...". References in the list must be in alphabetic order by authors. References to a paper "in press" are permissible, provided that the paper in question has been accepted for publication (indicate the doi or documentary evidence of acceptance). A reference to "unpublished work" is only permissible if it contains essential information; it should be available from the cited authors on request, and the names of all persons involved should be cited [first initial(s) followed by surname] in parentheses as "unpublished data". Any person cited as the

Tables and figures: They should be cited consecutively in the text, numbered independently with Arabic numerals and self-explanatory. Tables should be headed by a number and title. Explanatory notes that facilitate the interpretation of the tables should be included as a footnote to the tables. Figures may correspond to diagrams or photographs. The figure number and legend should be presented at the bottom of the figure. After the acceptance of the paper, photographs should be sent separately as image files (jpeg or tiff) with a finished size of at least 600 dpi (dots per inch). Figures prepared with excel or a similar program should be included in the text as MS Office Objects or sent separately in the format of their source program (*.xls or *.xlsx files).

Submission of Manuscripts

All manuscripts must be submitted online via the journal’s portal. <https://ijvph.org/article-submission/>

Publication Charge:

There is no publication charge or article processing fee for publication of the original research article, short communication, and review. Accepted color figures will be published in Grayscale in print version.
